### Warning!

This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions manual, it may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

Electric Shock Hazard – Do not operate the machine with its back cover removed. There are dangerous high voltages inside.

## Chapter 1

## **Getting Started**

### **1.1 Features**

- Solid aluminum die-casting chassis
- Variety of LCD panel size selections
- IP66 / IP69K(option) compliant front panel
- VGA, DVI-D, HDMI, and DP input
- Wide range DC 9~36V power input
- High Brightness LCD and Auto Dimming for optional(Except 7")
- Support protective AR glass for option (non-touch version)

### **1.2 Specifications**

	ARCDIS-1XXA Series
Outside I/O Port	
VGA	1
DVI-D	1 x DVI-D input (share with HDMI)
DP	1
HDMI	1 x HDMI input (share with DVI-D)
Audio	1 x audio line-in phone jack
OSD control	OSD on the rear side
LED Light	1 x system power LED light (not available for 19" and 23.8")
Speaker	1 x 2Wspeaker for option
Power	1 x 3-pins terminal block for DC 9~36V power input
Others	1 x USB type B for touch control
	1 x RS-232 DB-9 for touch control for option
Power	
Power Input	DC 9~36V
Touch Screen	
Туре	Resistive touch window (for R model, no 23.8" and 32")
	Projected capacitive touch screen (for P model)
	Protective AR glass with non-touch version(for G model)
Interface	USB
	RS-232 for option (Only for resistive touch model)
Light Transmission	Resistive touch window: over 80%

	Projected capcitive touch screen: over 90%
Mechanical	
Construction	Aluminum front bezel/Aluminum die-casting for back cover(17"/18.5"/19")
	(Aluminum chassis front bezel/ steel back cover for 23.8"/32")
Mounting	Panel mount / VESA mount 100 x 100 (VESA mount 200 x 100 for 23.8")
	Panel Mount/VESA mount 75 x 75(7" and 8")
	Panel Mount/VESA Mount 200(32")
IP Rating	IP66/IP69K(option) compliant front panel
Environmental	
Operating temperature	0~50°C
	-20~60°C is optional for 7", 8", 10.1", 12.1" and 15"
	(0~40°C only for 21.5" High brightness model)
Storage temperature	-30~70°C
Storage humidity	10 to 90% @ 40°C, non- condensing
Vibration	1G / 5~500Hz (Random) / Operation
Shock	15G peak acceleration (11 msec. duration) / Operation
Certification	CE / FCC Class A

### **1.4 Brief Description of ARCDIS-1XXAPRG(H)**

ARCDIS-1XXAPRG(H) with TB-6802 AD Board is an IP66 / **IP69K(option)** compliant front bezel aluminum die-casting chassis display, which comes with 7"to 23.8" color TFT LCD. But for 17"/18.5"/19" and 32", these models are Aluminum front bezel with steel chassis, with color RAL9007. The optional high brightness 1,000nits LCD is ideal for sunlight readable semi-outdoor applications. Furthermore, 12.1" display can be XGA 1024 x 768 resolution for option. The model series supports VGA, DVI-D, DP, and HDMI input, and it can be VESA 100 x 100 mounted. ARCDIS-1XXAPRG(H) series has more outstanding features, thus giving the best in monitoring and control applications.

## **Chapter 2** AD BOARD INFORMATION

### 2.1 AD Board Specification

Specifications	
Board Size	170 x 113 mm
Scalar IC	Realtek RTD2556T-CG
Input	1 x HDMI Input 1 x DisplayPort(DP) 1 x USB2.0(Type-B) 1 x VGA 1 x Line in (3.5mm Audio Jack)
Output	1 x Supports up to 24-bit LVDS FULL HD panel interface 1 x eDP Support 2x2W specker via SPKR1/SPKL1
Resolution	Up to 1920 x1080 @60Hz for LVDS Up to 1920 x1080 @60Hz for eDP
Power input	DC9~36V input
Temperature	Operating: -20°C to 70°C Storage: -40°C to 85°C
Humidity	10% - 90%, non-condensing, operating
EMI/EMS	Meet CE/FCC class A

### 2.2 Board Dimensions

Figure 2.1: Dimension of TB-6802(Top)

Figure 2.2: Dimension of TB-6802(Bottom)

#### External I/O

### 2.4 Jumpers Settings and Connectors

#### 1. PW1:

(5.08mm Pitch 1x3 Pin Connector), DC24V power input connector.

Pin#	Power Input
1	DC+24V
2	Ground
3	FG

Model	Connector Type	
TB-6802	2EHDVM-03P	
TB-6802P	ELK508S-03P	

#### 2. PW2 (<u>Option</u>) :

DC Jack

#### 3. HDMI1 (HDMI Input) :

(HDMI Connector), High Definition Multimedia Interface connector, provide high-quality video and audio input.

Signal Name	Pin#	Pin#	Signal Name

# 

Auto Button: One-touch auto adjustment

# 1.) Getting into Burn-in Mode

Before setting into a burn-in mode, first disconnect the AC power cord. Then press (don't let them go) the  $\checkmark$  buttons until the AC power cord is connected and the "RGB" appears on the top left corner of your screen. Now it can be put into the burn-in mode for changing colors.

# 2.) Getting Out of Burn-in Mode

Before getting out of the burn-in mode, please first disconnect the AC power cord. Then press the rest button (If not workable, press the rest button and don't let them go) until the AC power cord is connected. Please don't let your fingers go until the AC power cord is connected again and the wording of "RGB" appears on the top left corner of your screen, and wait for 3 second. Under the non-signal entry situation, if **Cable Not Connected** is seen, exit is thus successfully made.

#### When the Burn-in Mode is Unable to Eradicate...

- If the "RGB" is still on the top left corner of the screen, press up to enter
   "Miscellaneous" and choose "Reset", and then Yes, and press up. When the screen goes black, disconnect power and repeat the above steps.
- If the "RGB" is not found, disconnect the AC power cord first. Then press the buttons (don't let them go) until the AC power cord is connected, and wait for 2 to 3 seconds. When "RGB" appears, repeat the above steps.

# 3.2 OSD Controls

To make any adjustment, select the following:

- 1. Press 🖵 (Menu) to show the OSD menu or disable the OSD menu.
- 2. Select the icon that you wish to adjust with the ( $\checkmark$ / $\checkmark$  or +/-) key in the menu.
- 3. Press  $\Box$  (Menu) and then choose the item with the ( $\checkmark/\checkmark$  or +/-) key.
- 4. Press  $\square$  (Menu) and then adjust the quality with the ( $\checkmark$ / $\checkmark$  or +/-) key.

# 3.3 Main Menu

In the **PICTURE**, there are the following items:

- AutoBacklight
- Backlight
- Brightness:
- Contrast
- Sharpness
- Exit

In the **DISPLAY**, there are the following items:

# Chapter 4

# **Installation**

This chapter describes how to install drivers and other software that will allow your touch screen work with different operating systems.

# 4.1 Windows 7 Universal Driver Installation for

# PenMount 6000 Series

Before installing the Windows 7 driver software, you must have the Windows 7 system installed and running on your computer. You must also have one of the following PenMount 6000 series controller or control boards installed: PM6500, PM6300.

# 4.1.1 Installing Software(Resistive Touch)

If you have an older version of the PenMount Windows 7 driver installed in your system, please remove it first. Follow the steps below to install the PenMount DMC6000 Windows 7 driver.

## Step 1. Click Next to continue.

Step 2. Read the license agreement. Click I Agree to agree the license agreement.

PenMount Windows Universal Driver V2.4.2.325 Setup		
License Agreement Please review the license terms before installing PenMount Windows Universal Driver V2.4.2.325.		
Press Page Down to see the rest of the agreement.		
PLEASE READ THE LICENSE AGREEMENT		
PenMount touch screen driver software is only for using with PenMount touch screen controller or control board. Any person or company using a PenMount driver on any piece of equipment which does not utilize an PenMount touch screen controller will be prosecuted to the full extent of the law.		
If you accept the terms of the agreement, click I Agree to continue. You must accept the agreement to install PenMount Windows Universal Driver V2.4.2.325.		
Nullsoft Install System v2,46		

**Step 3.** Choose the folder in which to install PenMount Windows Universal Driver. Click **Install** to start the installation.

😼 PenMount Windows Universal Driver V2.4.2.325 Setup
Choose Install Location Choose the folder in which to install PenMount Windows Universal Driver V2.4.2.325.
Setup will install PenMount Windows Universal Driver V2.4.2.325 in the following folder. To install in a different folder, click Browse and select another folder. Click Install to start the installation.
Destination Folder           C:\Program Files (x86)\PenMount Windows Universal Driver         Browse
Space required: 0.0KB Space available: 136.8GB
Nullsoft Install System v2.46

Step 4. Click Yes to continue.

#### Step 5. Click Finish to complete installation.

# 4.1.2 Installing Software (Projected Capacitive)

Step 1. Click Next to continue.

Step 2. Select I accept the terms of the license agreement. Click Next.

eGalaxTouch	x
License Agreement Please read the following license agreement carefully.	
Declaration and Disclaimer	•

Questio	n 🔀
2	The eGalaxTouch driver has been installed, before operating touch function, please do 4 point calibration. Would you do 4 point calibration now ?

# 4.2 Software Functions

# 4.2.1 Software Functions(Resistive Touch)

Upon rebooting, the computer automatically finds the new 6000 controller board. The touch screen is connected but not calibrated. Follow the procedures below to carry out calibration.

- 1. After installation, click the PenMount Monitor icon "PM" in the menu bar.
- 2. When the PenMount Control Panel appears, select a device to "Calibrate."

## PenMount Control Panel(Resistive Touch)

The functions of the PenMount Control Panel are **Device**, **Multiple Monitors**, **Tools** and **About**, which are explained in the following sections.

## Device

In this window, you can find out that how many devices be detected on your system.

Pen M	Mount Control Panel	X
Device	Multiple Monitors   Tools   About	
Pe 60	ect a device to configure.	
	Configure Refresh	OK

## Calibrate

This function offers two ways to calibrate your touch screen. 'Standard Calibration' adjusts most touch screens. 'Advanced Calibration' adjusts aging touch screens.

Standard Calibration	Click this button and arrows appear pointing to red	
	squares. Use your finger or stylus to touch the red	
	squares in sequence. After the fifth red point calibration	
	is complete. To skip, press 'ESC'.	
Advanced Calibration	Advanced Calibration uses 4, 9, 16 or 25 points to	
	effectively calibrate touch panel linearity of aged touch	
	screens. Click this button and touch the red squares in	
	sequence with a stylus. To skip, press ESC'.	

Step 1. Please select a device then click "Configure". You can also double click the device too.

PenMount Control Panel	
Device   Multiple Monitors   Tools   About Select a device to configure.	1
PenMount 6000 USB	
Configure Refresh	
	ОК

Step 2. Click "Standard Calibration" to start calibration procedure

**NOTE:** The older the touch screen, the more Advanced Mode calibration points you need for an accurate calibration. Use a stylus during Advanced Calibration for greater accuracy. Please follow the step as below:

Step 3. Select Device to calibrate, then you can start to do Advanced Calibration.

Plot Calibration Data	Check this function and a touch panel linearity	
	comparison graph appears when you have finished	
	Advanced Calibration. The blue lines show linearity	
	before calibration and black lines show linearity after	
	calibration.	
Turn off EEPROM	The function disable for calibration data to write in	
storage	Controller. The default setting is Enable.

hold as right click			

# **Edge Compensation**

You can use Edge Compensation to calibrate more subtly.

# About

This panel displays information about the PenMount controller and driver version.

🟒 Device 0 (PenMo	ount 6000 USB)		
Calibrate Setting	Calibrate Setting Edge Compensation About		
/	PenMount 6000 USB (10-bit)		
	Driver Version	2.4.2	
	Firmware Version	6000.6.0.0	
	Firmware Config Data	2,36864,852,32,7,500,12	
		OK	

## **Multiple Monitors**

Multiple Monitors support from two to six touch screen displays for one system. The PenMount drivers for Windows 7 support Multiple Monitors. This function supports from two to six touch screen displays for one system. Each monitor requires its own PenMount touch screen control board, either installed inside the display or in a central unit. The PenMount control boards must be connected to the computer COM ports via the USB interface. Driver installation procedures are the same as for a single monitor. Multiple Monitors support the following modes:

> Windows Extends Monitor Function Matrox DualHead Multi-Screen Function nVidia nView Function

**NOTE:** The Multiple Monitor function is for use with multiple displays only. Do not use this function if you have only one touch screen display. Please note once you turn on this function the rotating function is disabled.

Enable the multiple display function as follows:

1. Check the Enable Multiple Monitor Support box; then click Map Touch Screens

to assign touch controllers to displays.

PenMount Control Panel Device Multiple Monitors Tools About	
Multiple Monitor Support	
	7
PonM Iount	Į.
TOUCH SCREE	
	-
Map <u>T</u> ouch Screens	

- 2. When the mapping screen message appears, click **OK**.
- 3. Touch each screen as it displays "Please touch this monitor". Following this sequence and touching each screen is called **mapping the touch screens.**

- 4. Touching all screens completes the mapping and the desktop reappears on the monitors.
- 5. Select a display and execute the "Calibration" function. A message to start calibration appears. Click **OK**.

- 6. "Touch this screen to start its calibration" appears on one of the screens. Touch the screen.
- 7. "Touch the red square" messages appear. Touch the red squares in sequence.
- 8. Continue calibration for each monitor by clicking **Standard Calibration** and touching the red squares.

#### NOTES:

- 1. If you use a single VGA output for multiple monitors, please do not use the **Multiple Monitor** function. Just follow the regular procedure for calibration on each of your desktop monitors.
- 2. The Rotating function is disabled if you use the Multiple Monitor function.
- 3. If you change the resolution of display or screen address, you have to redo **Map Touch Screens,** so the system understands where the displays are.

## Appendix A: Panel Mounting and VESA Mounting

The ARCDIS-1XXAPRG(H) is designed to be panel-mounted and VESA mounted as shown in Picture. Just carefully place the unit through the hole and tighten the given screws from the rear to secure the mounting.

## Figure A: Panel mounting and VESA mounting

## \*Notice :

Tighten the mounting clip screws by hand until the gasket seal contacts the mounting surface uniformly.

Tighten the mounting clips screws to a torque of  $8 \sim 10$  kgf-cm by using the specified sequence, making sure not to overtighten.

Attention

\*Tighten the mounting clips to the specified torque to provide a proper seal and to prevent damage to the product. Aplex assumes no responsibility for water or chemical damage to the product or other equipment within the enclosure due to improper installation.
