Embedded Box PC | Industrial Panel PC | Industrial Monitor

Reliable • Modular • Custom

INTRODUCTION

TAICENN is a **solution provider & manufacturer** of Industrial computing & display system from China mainland. We supply embedded box computer, industrial panel PC & industrial monitor products, which are designed specifically for systems and applications that require excellent performance, high-level reliability and stability, longer supply period and support.

2007 ~ 2016

Team leaders worked on different industrial computing companies with capable experience.

In 2016

TAICENN Founded in **Shenzhen**, focus on overseas industrial market;
Positioned as a global IPC products solution provider & manufacturer;
Specially developed new product lines to meet overseas market features;
Establish excellent support & products standards.

In 2017

Strictly apply "**Modular design & manufacturing**" concept;
Become a qualified supplier to "BOSCH" company;
Establish partnership with Germany, France, Italy, USA, UK, Netherlands, Brazil, Australia...

In 2018:

Developed new series of product lines to oversea market;
Applied **Modular 2.0** concept in design & manufacturing;
Local core channels established.

In 2019:

European (**Germany**) branch established;
Become a qualified supplier for "ThyssenKrupp" and "Porsche";
Schedule TAICENN American branch and local service.

In 2020:

TAICENN America branch will be established;

A close-up photograph of industrial computer hardware. In the foreground, several copper-colored cables are plugged into a multi-pin connector. To the right, a vertical panel of ports is visible, including a D-sub connector, a BNC connector, and several RJ45 ports. The background is blurred, showing more of the equipment. A semi-transparent blue rectangle is overlaid on the left side of the image, containing the text.

Our Vision

To be a Global Industrial Computing & Display System Provider from China mainland.

● TPC-PR Series rich IO resistive touch panel PC

Overview:

TAICENN TPC-PR series is a panel mount industrial touch panel PC, with high temp. 5-wires precision resistive touch and rich IO interfaces. Based on TAICENN's modular concept design, the TPC-PR series consists of TM-PR series industrial touch display module and TBOX-2 series PC modules, which can be equipped with a variety of Intel Celeron and Core i3/i5/i7 dual-core processor platforms, ranging from 10.4 inches to 24.0" availability. TPC-PR series is designed with 2* Ethernet ports, 6* USB ports, 6* serial ports, 1* HDMI and 1*VGA ports. TPC-PR series is PET laminated to achieve true flat design for resistive touchscreen panel.

● TM-OC Series open-frame Pcap. touch monitor

Overview:

TAICENN TM-OC series is a open-frame mount multi 10-points projective capacitive touch (Pcap. Or PCT) industrial monitor that supports open-frame mount and VESA 75/100 mount. TM-OC series capacitive touch monitor can be connected to 1* VGA and 1* DVI display port, equipped with excellent algorithm EETI controller; support multi-points (max. up to 10 points) touch; By default, the touch interface is USB interface, also optional with RS232 serial touch interface. In general, TM-PC series industrial monitor support DC 12V voltage input and optional wide voltage DC 9~36v power input. TM-OC series has a wide range of dimension from 10.4" to 21.5", includes 10.4", 12.1", 15.0", 15.6", 17.0", 18.5", 19.0" and 21.5". It also offers optional features, such as high resolution, high brightness solution, light sensor, full IP65 protection.

● TM-RC/RR Rack mount industrial monitor

Overview:

TAICENN TM-RC/RR series is a rack mount touch (Pcap. & Resistive) industrial monitor that also supports VESA 75/100 mount. It can support capacitive touchscreen and resistive touchscreen, equipped with excellent algorithm EETI controller. The rack mount industrial touch monitor comes with TAICENN modular design, with 1*VGA and 1*DVI dual display unit. It supports with DC 12v by default, and optional with wide voltage DC 9~36v range.

TM-RC/RR uses rugged and high strength construction with a metal housing to fit into the standard 19.0 -inch rack mount industrial cabinet. It is available with 4 size options: 15.0", 15.6", 17.0" and 19.0".

TAICENN
your last stop for customized solution

ODM & Customize Service

● Custom Stainless Steel solution & product

Customized Features:

- LCD display Dimension customization, ranges from 10.4 to 24.0 inch;
- Touchscreen customization, includes Pcap., Resistive, No touch options;
- Intel CPU platform customization, includes Baytrail, Apollo lake, Core i3/i5/i7;
- Stainless steel material customization, ranges from 304, 316 and 201 options;
- IO customization, includes quantity, type and position;
- Connector & cable customization, includes male/female and length;
- Full IP protection standard customization, IP65, IP66, IP69K options;
- Both industrial monitor and Panel PC are available.

● Custom Arm Mount solution & product

Customized Features:

- LCD display dimension customization, ranges from 10.4 to 24.0 inches;
- Both Pcap. and Resistive touchscreen are available;
- CPU platform customization, includes Intel Baytrail, Apollo lake, Core i3/i5/i5 options;
- Metal material customization, available sheet metal, CNC metal...;
- IO interface customization, includes quantity, type and cable length;
- Function key button customization, develop function board;
- IP protection level customization, includes front IP65, full IP65 options;
- Both industrial monitor and panel PC can be customized.

● Railway & High-speed Rail ultrasonic inspection

Outdoor | Sun-readable | Complete IP65 rating protection | 4U grip

Application Requirements:

Since it is outdoor application, the whole panel PC has to operate across wide temp. range. Also the show computer system needs to be fully sealed and integrated with waterproof aviation connectors, to prevent water and dust. Besides, the system works under sunlight in the daytime, thus the screen brightness has to be as high as 1000 nits. And auto light sensor is required.

Basic specification:

- 1- 19" TFT WXGA LCD, resolution 1440 * 900;
- 2- High brightness, up to 1000 nits, automatically adjust light sensor;
- 3- High temperature 5-wires resistive touch screen, longer durability and good stability;
- 4- High performance 6th Skylake-U or 7th Kaby Lake-U Core i5 processor, 8GB RAM + 256GB MLC SSD;
- 5- Full CNC metal parts, rugged water proof aviation connectors, unique spring lock design;
- 6- Fanless and full sealed designed, complete IP65 rating protection;
- 7- Special 4U grip in the front panel design.

● Vehicle mount computer system

TPC-DC080C1-E319

Basic specification:

- 1- 8" or 10.4" TFT LCD display, resolution 800* 600 or 1024 * 768;
- 2- High brightness 350 nits, support light sensor automatically adjust function;
- 3- Multi-points (10 points) projective capacitive touch screen;
- 4- Intel Baytrail Quad-core J1900 processor, 4GB RAM and 128GB MLC SSD;
- 5- Optional wireless 3G/4G and G-mouse VK-162 expansion;
- 6- Rich I/O ports: 3* USB2.0, 1* USB3.0, 2* GLAN, 4* RS232, 1* RS422 ports;
- 7- Fanless designed with large fin heat sink, front surface IP65 rating protection;
- 8- Wide voltage DC 9~36v power input, 3 meters long cable.

● Specially developed function computer system

High security tamper-proof industrial fanless computer

Application Introduction:

Tamper-proof means the system is protected from tampering (intentional malfunction or sabotage). It is usually a must for high security segments.

With tamper-proof design, our system can only be opened under reasonable operation. This will prevent the data stored in the SSD (storage device) from access by unauthorized party. The internal battery can assure the user data 100% overwritten and erased. Such embedded computer system is specially designed for high-level security.

Basic specification:

- 1- High performance Intel 6th Skylake or 7th Kaby Lake Core i7 CPU processors;
- 2- DDR4L 16GB RAM + Secure erase 64GB SSD;
- 3- 2* GLAN, 1* DC power connectors, rugged waterproof aviation connector;
- 4- Fanless design and CNC metal parts, complete IP65 rating protection;
- 5- Full sealed design, with light sensor inside for trigger.

● Specially developed function computer system

Industrial Panel PC with NFC/RFID module

Application Introduction:

This hardware system requires a 15.6-inch widescreen full HD 1920*1080 LCD screen; the system is recommended to use the 7th-gen. Core i5-7200U processor platform. Considering the application environment of direct sunlight, this industrial panel computer recommends to use high brightness 1000nits and automatic light-sensor integration. The adaptive LCD brightness is convenient for passengers to recognize and read; The integrated RFID (NFC) modules are convenient for realizing human-bus interaction and realizing functions such as card payment. Of course, the 4G/WIFI/GPS equipped with the machine can identify the positioning and network interconnection of the vehicle, which is convenient for fleet management and passengers's using.

Basic specification:

- 1- 15.6-inch widescreen, vertical display, Full HD 1920*1080;
- 2- Multi-point capacitive touchscreen, EETI precision algorithm touch control;
- 3- Intel low-power & high computing, 7th-gen. Core i5-7200U CPU, dual-cores 2.5Ghz, burst to 3.1Ghz;
- 4- LED backlight, high brightness 1000 nits, and automatic light-sensor;
- 5- Integrated NFC module function, supporting ISO 14443 protocol standard;
- 6- Integrate 4G, Wi-Fi, GPS functions and use a 3-in-1 combo antenna design;
- 7- Industrial grade LCD, whole system -20~+70C industrial wide-temperature range;
- 8- Various IO: 2*GLAN (Intel), 4* USB3.0, 2* COM ports, 1*HDMI, Mic-in/Line out.
