

## **GUIDE FOR LOAD CELLS, PRESSURE SENSORS AND TORQUES BY LOGICBUS**

# LOAD CELLS

## Load Sensors for all Industries

FUTEK's standard, custom, and OEM series provides diverse solutions for aerospace, medical, automotive, and manufacturing industries, just to name a few. These load sensors offer solutions for applications requiring both tension and compression measurements and an impressive capacity range of grams to thousands of pounds..

### • Popular Designs

- S-Beam/Z-Beam
- Rod End
- Load Button
- In Line
- Load Column/Canister
- Through Hole/Donut/Washer
- Pancake/Universal
- Side Mount

**FUTEK also offers a number of customized solutions:**

- Cryogenic
- Submersible
- Fatigue-Rated
- Non-Magnetic
- Miniature Design
- Dual Bridge
- Space/Flight Qualified
- High Temperature

# Miniature load sensors

- **S-Beam Jr. in miniature (LSB200)**

The S-Beam Jr. model is a miniature load cell capable of measuring compression and tension forces from 100 g to 100 lb. (444 Newtons). The miniature size of the LSB200 and its exceptional functionality for protection against overload make this model a highly adaptable solution for various applications in the sector. The following are other functions that demonstrate the versatility of S-Beam Jr.:

- |                                   |                      |
|-----------------------------------|----------------------|
| • Original equipment manufacturer | • Non-magnetic       |
| • Submersible                     | • Radiation tolerant |
| • Empty operation                 | • High temperature   |

FUTEK has an extensive selection of miniature load cells to measure tension and compression forces. These load cells support from 10 g to 20,000 pounds of force, making them ideal for applications that require high precision and resistance.

LSM250	0,25; 0,5; 1 lb. (1, 2, 4 N)	<b>OEM Load Cell</b> • Intended for high volume applications • Easily integrates into OEM applications • Side mounting OEM load cell • Built-in overload protection • Light-weight design • #29 AWG, 4 conductor, spiral teflon cable, 6 in [152.4 mm] long • Can integrate with analog VDC, mA, digital SPI, I2C, RS-232, UART output, and more	Rated Output: ..... 2 mV/V nom. Nonlinearity: ..... $\pm 0.05\%$ of RO Hysteresis: ..... $\pm 0.05\%$ of RO Operating Temperature: ..... - 60 to 200° F Excitation (max.): ..... 18 VDC Bridge Resistance: ..... 1000 $\Omega$ nom. Deflection: ..... 0.004" nom. Safe Overload: ..... 50 lb
LSM300	2,2; 5; 10; 25; 50; 100; 200; 500 lb. (9,8; 22; 44; 111; 222; 445; 890; 2224 N)	<b>OEM Load Cell</b> • Intended for high volume applications • Easily integrates into OEM applications • Built-in overload protection • Exceptional nonlinearity and nonrepeatability • Can integrate with analog VDC, mA, digital SPI, I2C, RS-232, UART output, and more • #29 AWG, 4 conductor, spiral teflon cable, 6 in [152.4 mm] long • RoHS compliant	Rated Output: ..... 2 mV/V nom. Nonlinearity: ..... $\pm 0.02\%$ to $\pm 0.06\%$ of RO Hysteresis: ..... $\pm 0.02\%$ to $\pm 0.06\%$ of RO Operating Temperature: ..... - 60 to 200° F Excitation (max.): ..... 18 VDC Bridge Resistance: ..... 1000 $\Omega$ nom. Deflection: ..... 0.0055 - 0.0080" nom. Safe Overload: ..... 250 - 400% of RO

## Tightening of bolts

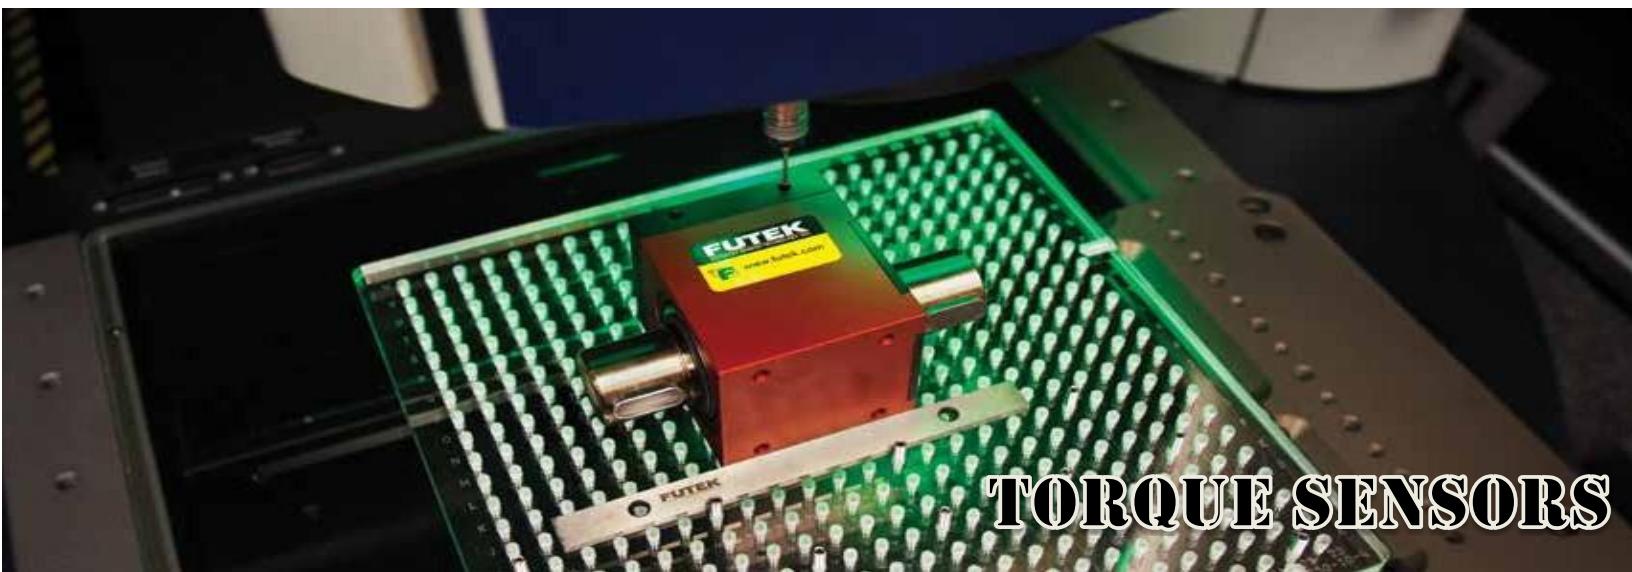

### SUMMARY OF APPLICATION

The through-hole load cells (donut type) from FUTEK are the most suitable for directly measuring the tightening torque of the load. In the through hole series (LTH) you will find various capacities and diameter sizes perfect for bolt tightening applications.

### PRODUCTS IN WHICH IT IS USED

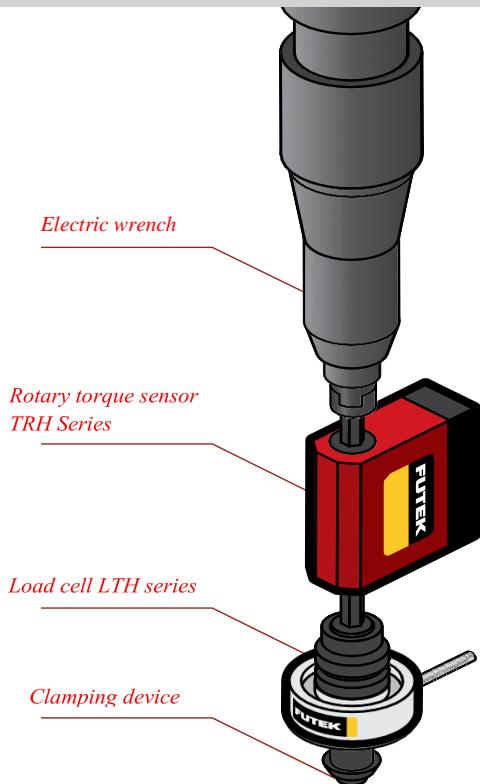

Thru-hole charging cell / donut type (LTH series) complemented with instrumentation solutions (USB solutions, IPM650 digital display, IHH500 handheld device or amplifier).

# TORQUE SENSORS

Among FUTEK's extensive list of products is an impressive array of strain gauge Reaction and Rotary Torque Sensors. FUTEK's Reaction Torque Sensors are designed for static torsional measurements, while our Rotary Torque Sensors generate dynamic measurements. Both sensors' families produce an electrical output signal that can be streamed through USB Solutions or read on any of our digital displays or amplifiers.

## Reaction Torque Sensors

Typically, reaction torque sensors are used for non-moving, in-line, and auditing measurement applications. Knowing this, we designed this torque series for versatility with multiple mounting options, different capacities, and various shaft dimensions.

- Static Measurements
- OEM Capabilities
- Proprietary Strain Gauge Technology
- Easy Integration with Instrumentation

## Rotary Torque Sensors

With model options including Drive, Hex, and Shaft-to-Shaft, engineers and operators will find an appropriate sensor to meet their specifications. These rotary torque sensors are well-suited for aerospace, automotive, and robotic applications.

- Multiple outputs - mV/V, VDC, or USB
- Up to 12,000 RPM
- Capacity Range up to 1,000 Nm
- Encoder Options

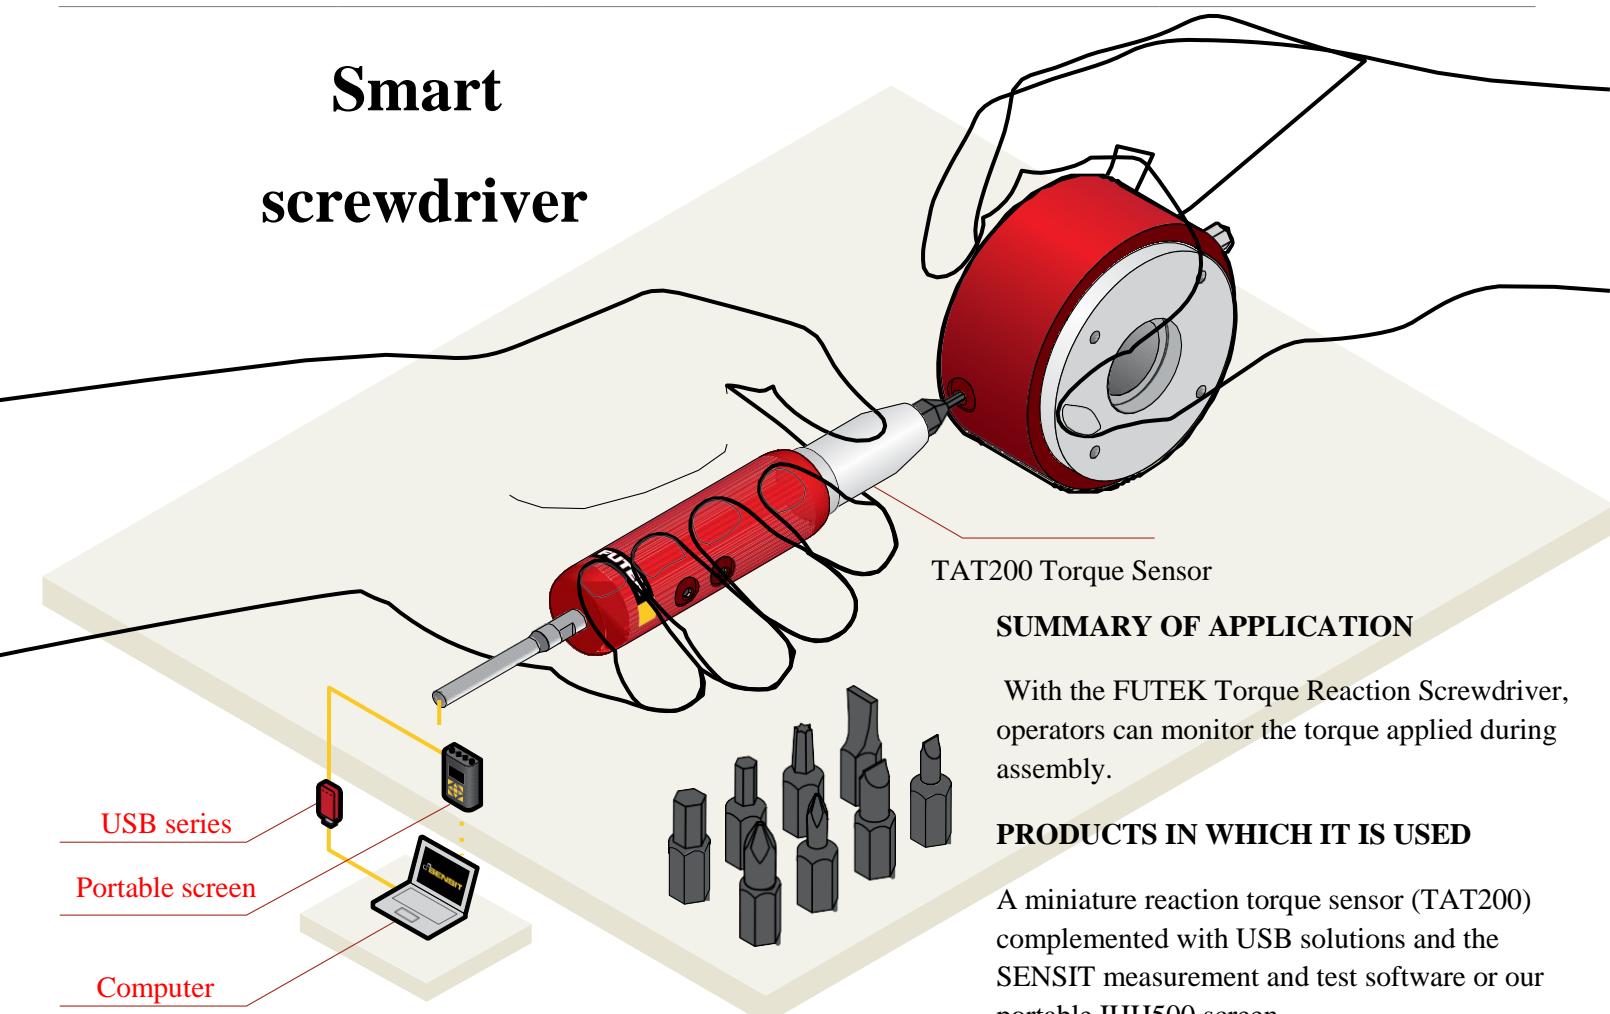

MODEL #	CAPACITIES	DIMENSIONS	SPECIFICATIONS
TAT200	50, 100 pulg.-oz. (353, 706 Nmm)	<b>Miniature Screw Driver Reaction Torque Sensor</b> • Designed for Torque auditing • Red anodized aluminum housing • Slim design • High accuracy • #28 AWG, 4 conductor, braided shielded PVC cable 10 ft [3 m] long	Rated Output: ..... 1 - 2 mV/V nom. Nonlinearity: ..... ± 0.2% of RO Hysteresis: ..... ± 0.2% of RO Operating Temp: ..... -60 to 160° F Excitation (max): ..... 18 VDC Bridge Res: ..... 1000 Ω nom. Safe Overload: ..... 150% of RO

## Smart screwdriver

# PRESSURE SENSORS

**FUTEK** offers high quality pressure sensors for various industries, such as aerospace, automotive, and general manufacturing. Utilizing strain gauge technology, these pressure sensors measure either gauge pressure or absolute pressure.

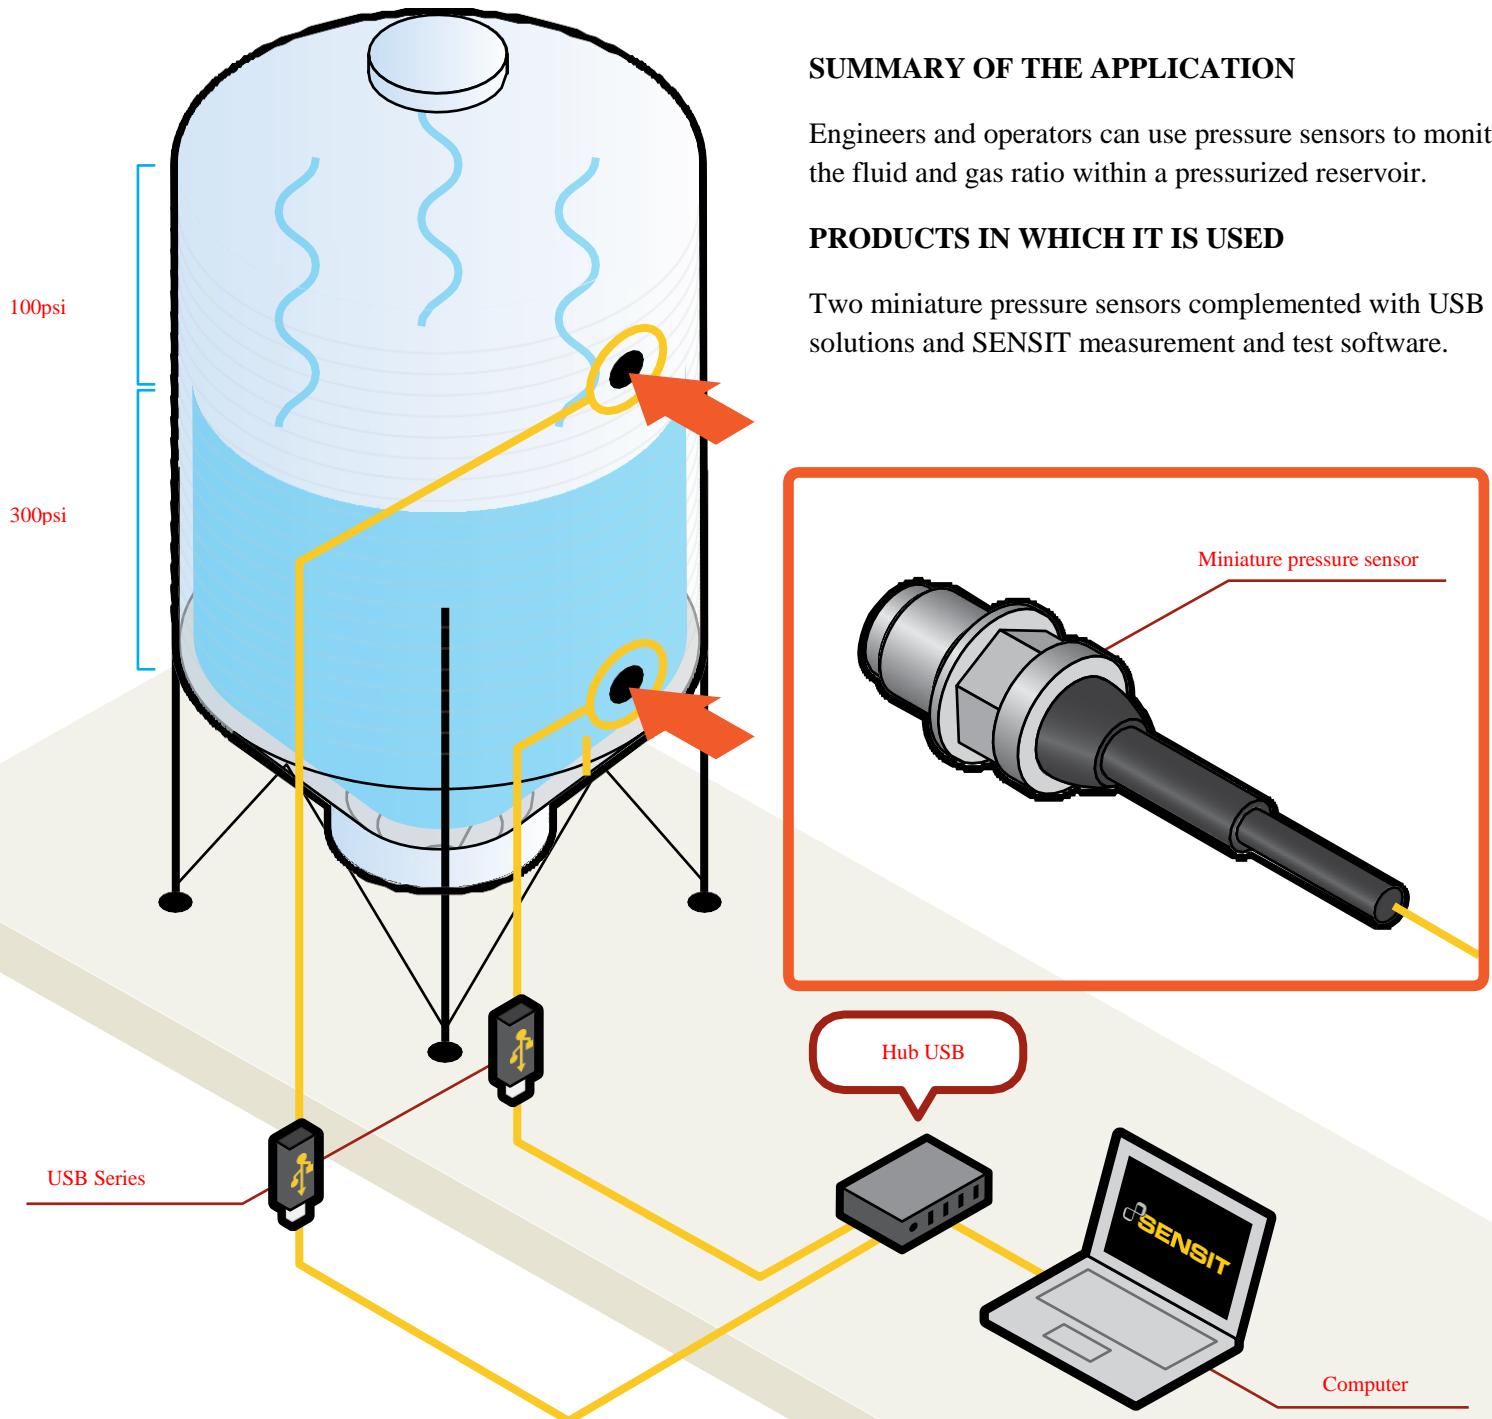

## The Complete Pressure Sensor Suite

FUTEK's pressure sensors have many notable capabilities, such as stainless steel wetted parts, flush diaphragm options, miniature models, OEM designs, high frequency response, and multiple output options. The full line of pressure sensors is compatible with FUTEK's instrumentation suite of digital displays, amplifiers, and USB modules.

MODEL #	CAPACITIES	DESCRIPTION	SPECIFICATIONS
PFP350	300, 1K, 5K, 10K psi (21, 69, 345, 690 bar) OEM	<b>Female Port Pressure Sensor</b> • 17-4 stainless steel • Unamplified output mV range • Pressure port: 1/4 NPT std. • 28 AWG, 6 conductor shielded Polyurethane cable, 3 ft standard. Quick disconnect Lemo® receptacle optional • Weight: 5.5 oz (156 g)	Rated Output: ..... 2 mV/V nom. Nonlinearity: ..... ± 0.5% RO Hysteresis: ..... ± 0.5% RO Operating Temperature: ..... -60 to 250° F Excitation (max): ..... 18 VDC Bridge Resistance: ..... 350 Ω nom. Safe Overload: ..... 150% RO
PFT510	225, 750, 3K, 7.5K, 10K psi (15, 50, 200, 500, 700 bar)	<b>Flush Mount Pressure Sensor</b> • Miniature size • Incredibly fast • Flush mount • Un-amplified out mV range • Mechanical engagement: M10 x 1 (optional 3/8-24) • 17-4 PH stainless-steel (Wetted/Body) • #29 AWG, 4 conductor, spiral shielded silicone cable, 5 ft [1.5 m] long	Rated Output: ..... 1 - 2 mV/V nom. Nonlinearity: ..... 0.4% of RO BFSL Hysteresis: ..... 0.2% of RO BFSL Operating Temperature: ..... -40 to 194° F Excitation Voltage (max): ..... 10 VDC Bridge Resistance: ..... 350 Ω nom. Safe Overload: ..... 150% of RO

# Differential pressure measurement

## SUMMARY OF THE APPLICATION

Engineers and operators can use pressure sensors to monitor the fluid and gas ratio within a pressurized reservoir.

## PRODUCTS IN WHICH IT IS USED

Two miniature pressure sensors complemented with USB solutions and SENSIT measurement and test software.

Automation

Sensors

Industrial Computers

Data Acquisition

Test & Measurement Equipment

North America

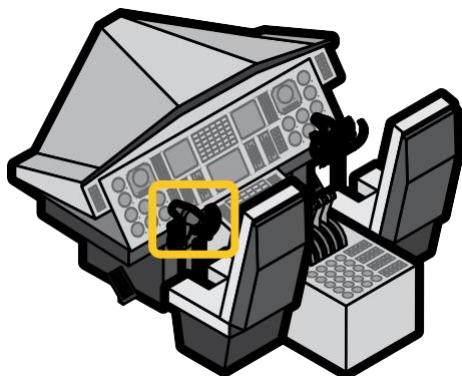

Central and South America

# MULTI-AXIS SENSORS

**Multi-axis sensors can accurately measure up to six components (three forces and three moments) of load/torque.** For example, independent strain gauge bridges are used to measure three directions of force: longitude, latitude, and vertical, as well as the moments of each force direction

MBA500

A careful structural analysis of the monolithic flexure has been done to isolate the forces and moments, which results in a reduction of cross-talk sensitivities.

FUTEK's multi-axis sensor series measures different configurations of load, bi-axial torque, tension, tri-axial load, and multi-axis low profile thrust and moment. Commonly used in robotic and automotive applications, multi-axis sensors offer simultaneous feedback from a single sensor component. These sensors are not limited to ambient operating environments, but are able to be modified for more extreme conditions, such as submersion, non-magnetic, and cryogenic temperatures. FUTEK also strives to integrate electronics (amplifiers or USB Solutions) within several multi-axis sensors.

## Capacities

- Encapsulated strain gages
- Low interference
- mV / V output
- High strength metals
- Capacity range: 10 - 25,000 lb.

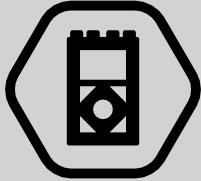

MODEL #	CAPACITIES	DESCRIPTION	SPECIFICATIONS

# INSTRUMENTS

**FUTEK** not only produces load, torque, pressure, and multi-axis sensors, but also an entire suite of instruments and software. From digital displays and amplifiers to USB Solutions, our engineering team designed and developed this line of instrumentation for versatility and efficiency. FUTEK's instruments integrate with our own SENSIT™ Test and Measurement Software, which was designed in-house at our headquarters.

Our Electrical Engineering Team is continuously working towards exploring new methods of data retrieval. From introducing a new differential amplifier to designing embedded transmitters and controllers, we are committed to offering efficient and smart instruments to our customers that are high performing and miniature in size.

#### Highlighted Display & Amplifier Capabilities:

- USB Link
- Analog Voltage / Current Output / Differential Output
- Strain Gauge / Amplified Sensor Output
- High Accuracy / Resolution
- Universal Unit Conversion
- Peak / Valley / Tare / Gross / Reset
- Embedded transmitters and Controllers

#### Highlighted USB Solution Capabilities:

- High Resolution
- High Accuracy
- Programmable Gain Digital Amplifier
- Selectable Sampling Rate
- ASCII Stream Output
- USB 2.0 Communication
