## INTELLIGENT TORQUE CONTROL ELECTRIC SCREWDRIVERS

- Precise Tightening
- Auto Setting
- Process Monitoring
- Error Alarm
- Data Traceability

## I-screwdriving system—Industry 4.0 factory assembly system:

**Feature:**

- Current Torque Control, Accuracy 5%
- Configurable Speed
- Angle/Torque Control Mode
- Monitor Screw Slipping, Floating and Missing
- Multi-task Setting
- Real Time Data Collecting
- Max. 100 Screwdrivers Connecting
- With DI/DO Connector
- Barcode Scanning

# IFACTORY--- INTELLIGENT TIGHTENING CONTROL SYSTEM

## SMART TOOL — Comprehensive integration of powerful functions

- Configurable speed and torque with 5% accuracy
- Speed mode / Angle mode / Auto mode
- Multi-steps tightening with process monitoring and error buzzer
- Self-learning & parameter generating to minimize setup time
- Optional reverse rotation at tightening complete
- Multi-task setting for seamless workflow switch
- Memory card integrated

# INTELLIGENT TIGHTENING CONTROL SYSTEM

## IFACTORY — Ready for industry 4.0

- I/O port for real time control and data record
- Tightening process graphic data and analysis
- Barcode scanner port included, capable of part code scanning and identification
- Real time parameter remote setup and display to realize advanced control with unrivalled ergonomics
- One controller connected to multiple screwdrivers with different setting

Model	Torque Range		Speed Range	Input voltage	Applicable screws	Controller	Remarks
	Ncm	in/lb	rpm	V	Screw Diameter		
N-NM008-H	1~7.8	0.1~0.6	30~1300	24v	M1.0~M1.6	N-NC008-PRO	Manual
N-NM006-F	1~5.8	0.1~0.5	30~1300	24v	M1.0~M1.6	N-NC008-PRO	Machine
N-NM030-H	4.9~29.4	0.5~2.6	30~1000	24v	M1.4~M2.5	N-NC030-PRO	Manual
N-NM025-F	4.9~24.5	0.5~2.1	30~1000	24v	M1.4~M2.5	N-NC030-PRO	Machine
N-NM080-H	9.8~78.4	0.9~6.9	30~1000	36v	M2.0~M3.5	N-NC080-PRO	Manual
N-NM065-F	9.8~63.7	0.9~5.6	30~1000	36v	M2.0~M3.5	N-NC080-PRO	Machine
N-NM200-H	39.2~196	3.5~17.4	30~700	36v	M2.5~M4.5	N-NC200-PRO	Manual
N-NM160-F	39.2~156.8	3.5~13.9	30~700	36v	M2.5~M4.5	N-NC200-PRO	Machine
N-NM500-H	147~539	13~48	30~500	36v	M4.0~M6.0	N-NC500-PRO	Manual
N-NM450-F	147~500	13~44	30~500	36v	M4.0~M6.0	N-NC500-PRO	Machine

# INTELLIGENT COUNTING SCREWDRIVER

## FEATURES

- Torque accuracy within 5%, robust structure increases system performance, consistency and durability;
- Capable of monitoring finished and remaining fasteners;
- Multi-task planning: 4 pre-set parameters & manual/auto mode switch available;
- Real-time process monitoring and error buzzer;
- I/O ports or data transmission and process control;
- Continuous speed setting.

Model	Torque Range		Speed Range	Input voltage	Applicable screws
	Ncm	in/lb	rpm	v	
S-NMC080-H	9.8~78.4	0.9~6.9	30~1000	36v	M2.0~M3.5
S-NMC200-H	39.2~196	3.5~17.4	30~700	36v	M2.5~M4.5
S-NMC500-H	147-539	13-48	30~500	36v	M4.0~M6.0

# INTELLIGENT SCREWDRIVER CONTROL CHARACTERISTIC

## CHARACTERISTIC DRAWING

Torque monitor, detect the screwing starting automatic, to promote the control accuracy

## ERROR PROOFING

## MONITORING, AND REPORTING

### 1. Monitoring

Real time display of tightening status, working hours, output quantity, and cycle time.

### 2. Reporting

All tightening data including torque, angle, status can be saved and exported, which offers traceability.
